How qualitative research can foster the spirituality of the chaplain

ENHCC June 2018

Rev. Nico A. van der Leer
PhD researcher
University of Humanistic Studies
Utrecht, the Netherlands
Research and spirituality
Integration of spirituality on 3 levels

1. Personality – profession
2. Intellect - emotions
3. Chaplaincy - research
1. Personal experience counts, as it is important research data

2. Qualitative research is not only a rational and emotional experience but also a spiritual one

3. Qualitative research is comparable to the daily work of a chaplain
My own experience counts, as it is important research data

Integration (1)

- personal
- professional
- spiritual
Qualitative research is not only a rational and an emotional experience but also a spiritual one.

Qualitative research is comparable to the daily work of a chaplain

The story of the vine
Thank you for your attention

What is your experience of being a chaplain-researcher?

How would you integrate chaplaincy, research and spirituality?
